Easy!

AquaWorx is a full-service aquatic play manufacturer of American-made waterslides, interactive water toys and playsets.

We provide everything you need for your resort water park, splash pad or pool — from design to engineering — from 3D color renderings to filtration systems — from waterslides to collector tanks — for any aquatic play environment. We design, engineer and fabricate AquaWorx products in our Florida facility and are always accessible for consultation and factory support. Assuring complete customer satisfaction is a hallmark of our organization. AquaWorx products are the best value in the business!

filter packs

for Splash Pads, Pools, Fountains, Interactive Playsets and Water Toys

Durable!

With AquaWorx as your partner, your commercial or residential landscape becomes a fully functional, compliant water paradise. Your water project will include our highly acclaimed filtration system designed for reliability you can trust. Construction combines a durable fiberglass lid that will not warp, stainless steel hardware on hinges and latches, pumps along with unions for ease of removal, and a strong one inch floor. Two colors are available to help blend into the surrounding landscape: forest green and white. All packs and subpanels are UL1081 approved, plus EPA validated and NSF approved UV is available.

Filter packs are designed using:

- DE
- Sand
- Vacuum Cartridge
- Pressure Cartridge
- UV equipment
- River Flow Thrusters

Custom sizes available to fit any need.

Standard sizes are: 5' x 6', 5' x 8', 5' x 11' and 7' x 10'.

Save time and money with AquaWorx, a quality single source provider for all your aquatic needs.

filter packs

AQUAWORX

collector tanks

Ecological Tanks Enhance Natural Settings

collector tanks

Go Green!

Exclusive AquaWorx Collector Tank Offerings:

- Freestanding available
- Fully customized (any shape and size)
- Designed with creative color options
- Subterranean with hatch access
- Fully finished with backfill skirts
- Steel reinforced with couplers and a three-part process to protect against leaking (on larger models)

We revolutionized the industry by showcasing our green, patented fiberglass tanks, 65 to 4,000 gallons, and larger adaptable sizes can be customized for your needs. Each collector tank is streamlined to blend into the landscape setting to hide plumbing, wiring and unsightly mechanical fixtures. Best of all, AquaWorx will never tank on you! We provide customer service from planning to installation...even after the sale.

pool gutters

Spectacular Fiberglass Gutters for Clean, Safe, Economical Filtration

Clean!

The recirculation of sparkling clean, filtered water is the most important responsibility of every landscape engineer, construction foreman, municipality, park/resort owner, and spa executive. It means clear, clean, sanitized water quality for your aquatic facilities. It also guarantees compliance with regulatory agencies. It's the most critical factor for water parks, guest relations, and recreation success. We specialize in it!

We never consider salvaging old gutters or parts. Each pool gutter is customized for your convenience and design satisfaction. We utilize state of the art laser technology, fiberglass molding construction and precision on every project.

From seaside to city side, commercial municipalities to residential settings, AquaWorx is ready to serve your needs!

pool gutters

An aerial photograph of a water park slide. The slide is a large, enclosed, metallic structure with a white roof and a blue and white striped exterior. It curves around a pool area. To the left of the slide is a pool with a rocky, natural-looking edge and a small waterfall. The surrounding area is landscaped with green grass, tall cypress trees, and a brick building in the background. A decorative blue and white water splash graphic is overlaid on the bottom left of the image.

waterslides

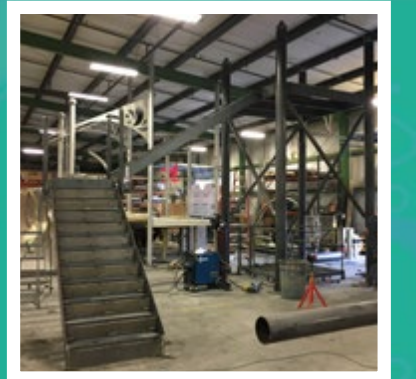

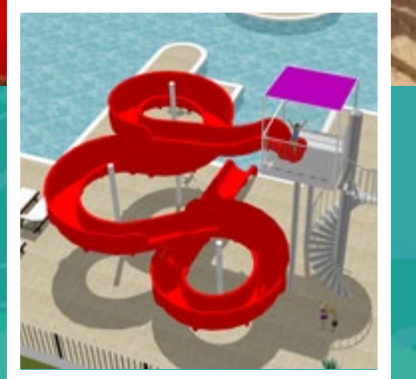

Glide!

Race, turn, and twist along the rushing waters of an AquaWorx Waterslide. Whether you are seeking high speed thrills or beginning to experience the wading depths of the kiddie pool, AquaWorx waterslides are engineered for riders of all ages and abilities. Structurally superior and beautifully finished, our slides are custom made to your specifications – open or enclosed, indoor or outdoor, wide or narrow, short or tall – for each unique, aquatic landscape.

Waterslide Manufacturing and Installation

AquaWorx works with customers through every stage of their project, beginning with initial on-site consultation advancing all the way to post construction with annual maintenance programs that preserve structural beauty and safety. Exemplary engineering and custom fiberglass molding go hand in hand with projects ranging from new construction to total structure replacement. Complete waterslide packages include proper filtration, powder-coated or galvanized steel towers, and product installation.

Double the speed, double the fun! The Aqua Dueling Slide allows riders to choose their aquatic adventure. Add pops of color to each slide piece to create a custom fiberglass flume that will have guests in awe of your unique waterslide. Twist and turn down a winding closed flume or plunge into the depths of the swimming pool on a wide, open flume.
