

A photograph of three children playing in a water park. A young girl in the foreground, wearing a colorful floral swimsuit, is smiling and has water on her face and hands. Behind her, a boy is also smiling and playing with the water. To the right, another child's legs are visible, splashing in the water. The background shows a large blue water slide structure. The entire image is framed by a large, white, abstract shape that resembles a splash or a drop.

ORDERING MADE EASY!

Ordering products is as simple as contacting a Water Odyssey sales representative at 512-392-1155 or sales@fountainpeople.com. Our knowledgeable sales staff can answer any questions you may have, including providing up-to-date pricing and shipping information for all Water Odyssey products.

Our passion is to promote joy, learning, inspiration, and socialization through unique aquatic play experiences. Our design team collaborates with architects, landscape architects, aquatic consultants, artists, and end users around the world to develop innovative aquatic play environments and equipment.

The possibilities for water play are endless, and sometimes, navigating them can feel as overwhelming as a tidal wave. That's why this catalogue isn't just a list of products—it's a curated guide to creating unforgettable memories. Whether you are looking for gentle, interactive toddler zones or high-energy, dumping buckets for older thrill-seekers, our goal is to simplify your design process, ensuring your project is fun, durable, and perfectly suited to your community.

BACKED BY A WORLD CLASS COMPANY

PlayCore helps build stronger communities around the world by advancing play and recreation through research, programs, and partnerships. We infuse this learning into our complete family of brands.

We combine best in class planning and education programs with the most comprehensive array of recreation products available to create solutions that match the unique needs of each community we serve. To learn more, log on to www.playcore.com

CREATE WITH AQUATIC PLAY

Driven by imagination and inspired by play, Water Odyssey brings creative aquatic environments to life with engaging features designed to spark excitement for guests of all ages and abilities.

- 💧 Fountain People, makers of Water Odyssey, is a leading designer and manufacturer of aquatic playground equipment for spray parks and aquatic facilities.
- 💧 With over 25 years of proven performance, Fountain People is a world leader in the manufacturing of modular pumping and water treatment systems designed specifically for water features and aquatic play.
- 💧 Water Odyssey specializes in creating unique project-specific products from interactive games to highly themed spray features.
- 💧 From architectural to themed spray features, Water Odyssey has the largest offering of interchangeable products available.
- 💧 Water Odyssey's Aqua Armor is the most durable coating system for the aquatic play industry.
- 💧 As an industry leader, Water Odyssey brings cutting edge technology to the design of aquatic playgrounds and provides the highest quality aquatic play equipment available.
- 💧 Water Odyssey products are installed in commercial and municipal facilities all over the world. All Water Odyssey products are made in the USA and fabricated at our facilities in San Marcos, TX.

What is an Aquatic Playground?

An aquatic playground, also known as a spray park or splash pad, is a recreational area designed specifically for interactive water play. Unlike swimming or wading pools, aquatic playgrounds are designed to have no standing water thus reducing the risk of drowning. These areas improve public spaces and provide an ideal setting for family recreation.

A community considering the addition of a recreational facility should consider an aquatic playground. Children have a natural affinity for water and Water Odyssey can provide them with a wholesome interactive aquatic play environment.

What is an Aquatic Play Pool?

An aquatic play pool is a recreational area in an aquatic center or water park that is designed specifically for interactive water play at a depth of 2 or more inches of water. These areas are commonly known as wading pools & beach-entry pools, and typically require lifeguards. Water Odyssey provides ideal solutions for these play environments.

Aquatic Playgrounds:

- cost less to install than a swimming or wading pool.
- cost less to maintain than a swimming or wading pool.
- are safer since there is no standing water.
- do not require Lifeguards.
- are an ideal community recreational attraction.
- stimulate children’s senses through interactive aquatic play.
- are programmable to enhance the play experience.

Aquatic Play Pools:

- can incorporate multilevel aquatic play structures for added play value.
- can utilize water from the pool’s pumping system for spray features.
- stimulate children’s senses through interactive aquatic play.
- can generate revenue through ticket sales.

“We don’t stop playing because we grow old;
we grow old because we stop playing.”

– George Bernard Shaw

INNOVATIVE SOLUTIONS FOR
AQUATIC PLAY NEEDS

Unique features for
unique facilities

Water Odyssey offers a wide range of unique spray features. With vibrant colors, unique themes, and custom creations we can set your facilities apart from the rest.

Get the most play value

Eliminate extra costs by doing the job right the first time. Our high-quality products maximize play value and minimize maintenance costs to extend the life of your parks for years to come.

Low flow features for
water conservation

We understand that water conservation is a big deal. That’s why we provide a wide variety of options from spray features to water management solutions, so you can make every drop count.

The beauty of
interchangeability

Don’t limit the potential of your aquatic play facility. If you plan for future expansion, or just want the ability to switch out spray features with ease, then the Switcheroo Anchoring System is right for you. Fun Forms® are also interchangeable, so it’s easy to switch out elements, or retrofit old spray features without undergoing costly renovations and downtime.

Keeping safety in mind

As a family company, we know how important safety is when it comes to children. That’s why Water Odyssey spray features & systems are designed and manufactured in accordance with ASTM standards F2461-09 and F1487-11.

Fun For Everyone

We believe it’s important to design and develop our products for people of all abilities to promote inclusive play. That’s why Water Odyssey products are ADA and DDA Compliant!

Water Odyssey Catalog

SIGNATURE BENEFITS

OF WATER ODYSSEY

SWITCHEROO ANCHOR BASE SYSTEM

- The originator of the flange-mounted anchor base system for maximum interchangeability
- Ideal for sensitive budgets and future expansions

STAINLESS STEEL MANIFOLDS AND BRASS VALVES

- High quality 304 stainless steel manifolds and brass valves come standard.
- Extends the life of the water management system
- Reduces maintenance
- Stands up to extreme climates

BRASS AND STAINLESS STEEL NOZZLES

- Precision machined for the ideal water effect
- Durable and resistant to rust
- Tamper-resistant
- Easy to maintain

LOW-PROFILE FLANGES ARE EASY ON THE FEET

- All flanges are low-profile with rounded edges
- Rounded button-head hardware
- Reduces the risk of stubbed toes

WATER MANAGEMENT SYSTEMS FOR EASY INSTALLATION

- Pre-designed and pre-wired
- UL Listed control systems for safety
- Factory programmed for easy start-up
- Field programmable for future adjustments

ROTATIONAL JOINTS

- Free of pinch points for safety
- Stainless steel and thermoplastic construction that is corrosion & chemical resistant
- 360° rotation with no mechanical stops that will break
- Integral flow control valve that is factory set and field adjustable to dictate the spray zones so water won't spray off the pad

AQUA ARMOR - SUPERIOR COATING SYSTEM

- Stands up to chemicals, UV, and active play
- Structural elastomeric coating that is vandal-resistant
- Easy to clean from calcium build-up

CUSTOM THEMING CAPABILITIES FOR A TRULY UNIQUE LOOK

- Hand-crafted spray features from talented artists
- Designed & manufactured to meet your vision
- Theming allows you to enhance your brand and create an immersive experience

WATER ODYSSEY DESIGNS FOR SAFETY AND ADA COMPLIANCE.

- Key considerations are age-appropriate play areas, transition areas, traffic patterns, splash zones, play value, and overall aesthetic of the project.
- Products are designed & manufactured to be in accordance with ASTM safety standards and ADA accessibility for maximum participation of ground level spray features, activators and interactive equipment.

SUPERIOR DESIGN SUPPORT TO HELP YOU BUDGET, PLAN, AND BRING YOUR VISION TO LIFE

- We provide concept details, budget analysis and bid documentation including specifications, 3D renderings, plan views, piping diagrams & electrical drawings
- We can provide 3D animations of your project upon request
- We provide ongoing customer support for the life of the project.

LET THE AQUATIC PLAY ADVENTURE BEGIN!

IMMERSIVE THEMING INSPIRED BY TURN OF THE CENTURY MECHANICAL ENGINEERING

The Aqua Steampunk™ line of themed spray park products brings industrial-inspired imagination to life through interactive, story-driven aquatic play.

The Blaster Ray is a mechanical-themed spray gun that invites users to engage in dynamic water play, while the Shield Cannon features a translucent spyglass that allows children to target, shoot, and take cover as water cascades over the shield for added excitement and interaction. Completing the collection, the Hex Table is a vertical, dual-sided water play table equipped with gear-themed spinners, encouraging hands-on exploration and collaborative play.

INNOVATIONS

MASSIVE SPLASH®

MODULAR, SCALABLE, FUN

MASSIVE SPLASH® - A TIPPING BUCKET CENTERPIECE FOR AQUATIC PLAY

Massive Splash® is designed to be modular and scalable to accommodate multiple buckets and configurations depending on the bucket and size of the wet play area.

Configurations include buckets with a 17-gallon capacity for a random directional splash and arching sprays for constant engagement. Multi-bucket configurations reduce wait times. Patrons anticipate the splashes with the movement of the bucket. This feature is a true centerpiece for your splash play area.

“It is a happy talent to know how to play.”
– Ralph Waldo Emerson

A CANVAS OF COLORS, SHAPES, TEXTURES & LIGHT

Durability

ColorCast accents are made of a rigid urethane polymer and carefully handcrafted by our talented artists. These accents are semi-flexible to absorb impacts & increase longevity.

UV and Chlorine Resistant

Vivid colors are protected by UV inhibitors to reduce fading overtime. ColorCast has a natural resistance to chlorine, reducing the potential for degrading and brittleness.

Low flow features for water conservation

We understand that water conservation is a big deal. That’s why we provide a wide variety of options from spray features to water management solutions, so you can make every drop count.

Fun For Everyone

This contemporary product line is designed for people of all abilities to interact with the features. Whether twisting, spinning, or plugging streams of water, these spray features are sure to appeal to all.

The beauty of interchangeability

This colorful line is designed around our 4-inch anchor base, allowing for maximum interchangeability.

Translucent colors and shadow casting.

ColorCast accents are offered in a variety of colors that cast fun shadows on the deck surface as light passes through them. Overlapping accents creates an educational experience with color mixing.

URBAN DESIGNS
COLORCAST

Combine Water Odyssey Essentials with ColorCast for a diverse aquatic play experience with architectural appeal.

ColorCast and Essentials are available with a textured or smooth finish. Contact your representative for more information.

TIMELESS AQUATIC PLAY PRODUCTS

Durable and dependable

All Essentials are made of 304L stainless steel, and protected with UV & chemical resistant Aqua Armor, the most durable coating system in the industry.

Get the most play value

Essentials is an extensive line that offers a wide variety of spray effects, dumping buckets, hoops, and interactive features that can twist and turn for added play value.

Low flow features for water conservation

We understand that water conservation is a big deal. That's why we provide a wide selection of product options in the Essentials line. Our design staff will help with your water requirements so you can make every drop count.

The beauty of interchangeability

Don't limit the potential of your aquatic play facility. If you plan for future expansion, or just want the ability to switch out spray features with ease, then the Switcheroo Anchoring System is right for you. You can start small with ground sprays, then you can switch them out at a later date for larger features like Essentials and ColorCast.

Keeping safety in mind

As a family company, we know how important safety is when it comes to children. Essentials are designed and manufactured in accordance with ASTM standards F2461-09 and F1487-11.

Fun For Everyone

Essentials are designed and developed for people of all abilities to promote inclusive play. That's why Water Odyssey products are ADA and DDA Compliant!

TUNNELS,
DUMPING
BUCKETS &
INTERACTIVES
FOR ACTIVE PLAY

Dumping buckets create anticipation as children try to guess which bucket will splash down on them from above.

Rings and Coils create visual transitions, promoting active play and movement through the space.

Sequencing water effects can encourage interaction with each feature and promote water conservation.

FEATURED PROJECT

SLAYTER CREEK PARK SPLASH PAD

The revitalized Slayter Creek Park Splash Pad boasts a sprawling 10,533-square-foot water playground, expanding by more than 2,000 square feet compared to the original. This substantial expansion allows for a more immersive and enjoyable aquatic play experience for visitors of all ages and abilities.

The park incorporates over 60 Water Odyssey water park toys, including the Massive Splash®, Zen Shower, Water Worm, a variety of Mushroom Mazes, Spin-A-Round, Water Coils, and the Fling Buckets. These engaging water park toys cater to a wider audience and create a dynamic and interactive spray park.

In addition to the spray park renovation, the project includes several enhancements to the park. New sidewalks enhance accessibility, a fitness court promotes an active lifestyle, and shade structures offer respite from the sun, enhancing the overall visitor experience.

THEMED ESSENTIALS

THEMED ESSENTIALS

IMAGINATION AT PLAY

Water Odyssey captures the essence of theming when it comes to aquatic play. It's an artistic combination of hand-detailed carving and painting that make these features come to life. With over 200 years of collective experience in custom fabrication for the aquatic industry, our artists lead the way in the creation of truly unique spray features that set Water Odyssey apart from the rest.

Unique features for unique facilities

Themed Essentials can be painted with logos, sponsor names, and other graphics. Vibrant colors, theming, and custom creations help set your facilities apart from the rest.

Durable & long-lasting

All Themed Essentials are made of 304L stainless steel with the addition of hand-crafted themed creations. These spray features are protected with UV & chemical resistant Aqua Armor, the most durable coating system in the industry.

Interchangeable

Themed Essentials are interchangeable through the Switcheroo anchor base system and can easily be swapped with other spray features, allowing you to plan for future upgrades.

For custom themed products visit www.waterodyssey.com to find your local Water Odyssey representative, or contact us.

Recreational spaces allow for exciting opportunities to stimulate and enrich the senses for people of all abilities.

SPRAY FEATURES
THAT TWIST
& TURN ADD
IMMENSE PLAY
VALUE

IMAGINATION AT PLAY

From Gravity Cannons to themed Spin N’ Sprays, Water Odyssey offers an extensive selection of high quality sprayers. Hand-detailed theming, and innovative features such as gravity controlled shut-offs & activators make spray features like these one-of-a-kind.

Spray safely

Water Odyssey Sprayers are free of pinch points and can rotate 360° with no mechanical stops that will break over time. Sprayers also come standard with an integral foam nozzle that emits an aerated stream that is soft to the skin. Water conserving options are available.

Adjustable spray zones

Sprayers have a stainless steel integral flow control valve that is factory set and field adjustable to dictate the spray zones so water won’t spray off the pad.

Interchangeability

All Shooters & Sprayers are interchangeable. Change from theme to theme, or update your spray park with the next great product from Water Odyssey. Contact your local representative for more information.

For custom themed products visit www.waterodyssey.com to find your local Water Odyssey representative, or contact us.

GRAVITY & G2 SERIES

The Gravity Series sprayers are built around our unique soft-feel foam nozzle and are available with 45 to 360 degree swing (operating range) in both planes - standard is 90° horizontal swing by 45° vertical swing. This unit is available with a hidden wireless activator for virtually instantaneous on/off operation.

Options: Water Conserving Nozzle, Wireless Activator.

THEMED SPRAYERS

HANDCRAFTED CREATIONS FOR THEMED AQUATIC PLAY

These playful spray features are designed to go anywhere and everywhere. Municipalities choose Fun Forms® for their rigid durability and long-lasting color. Water parks choose them to enhance their visual brand and create an immersive experience for their patrons.

Unique features for unique facilities

Water Odyssey offers a wide range of unique spray features. Vibrant colors, theming, and custom creations help set your facilities apart from the rest.

Durable & long-lasting

Fun Forms® are protected by Aqua Armor, the strongest, most durable coating in the industry.

Interchangeable & great for retrofit

All Fun Forms® are manufactured to be easy to install, and make retrofit projects a breeze.

Limitless possibilities

The Fun Forms® line includes over 200 designs to choose from, or bring us your ideas and we can bring them to life!

Fun for all children – Toddlers to Tweens

Fun Forms® are intentionally designed to inspire youthful imaginations with bright colors and caricatured features for a truly fun look.

Fun Forms® Aqua Spouts Themed play with gentle spray effects!

Perfect for any aquatic play setting Aqua Spouts are designed to complete any theme. These low level features are ideal for soft spray zones and provide a variety of gentle water effects. There are over fifty brightly themed hand detailed standard designs to choose from.

Fun Forms® Aqua Sprayers Themed Play at its Best!

Fun Forms® Aqua Sprayers are perfect for any aquatic play setting. Designed to complete any theme, these sprayers appeal to ages 3 and up. Aqua Sprayers offer a wide variety of water effects such as misters, fans, and streams. Combinations of effects add play value to these unique spray features. There are over seventy brightly themed hand-detailed standard designs to choose from.

Fun Forms® Aqua Slides Slide into action!

Fun Forms® Aqua Slides are great additions to any aquatic play setting. Aqua Slides meet ASTM requirements and are offered in various sizes to fulfill the needs of different age groups: Ages 2-5 and 5-12. There are over forty brightly themed hand-detailed standard designs to choose from.

Custom designs are available. Contact your local Water Odyssey representative for more information.

FUN FORMS® DINOSAUR THEME

SPLASH BACK IN
TIME TO AN ERA
WHERE AQUATIC
PLAY NEVER
GOES EXTINCT

With bold colors, lifelike designs, and playful personalities, these prehistoric pals elevate your splash pad into an aquatic play destination.

Combine dinosaur-themed Fun Forms® with rock-like formations to bring your prehistoric discovery site to life.

LITTLE LIGHT HOUSE SPLASH PAD

1

5

2

3

The Little Light House in Tulsa, Oklahoma, is internationally recognized for its exceptional early intervention services and individualized education for children with special needs from birth to age six. As a tuition-free Christian developmental center, Little Light House operates through the support of generous individuals, organizations, and community partners, empowering a team of over 90 staff to serve more than 300 children and families each year.

Little Light House recently unveiled the Sarah A. Harmon Splash Pad, named in memory of a beloved intern from the center's therapy department who specialized in Speech-Language Pathology. Sarah's passion was serving children with special needs, and her favorite activity at Little Light House was "Water Day", a joyful, group-based outdoor aquatic play experience. The splash pad stands as a tribute to her legacy, bringing that same aquatic play experience to life every day for the students at Little Light House.

Spanning 2,179 square feet, the splash pad features an immersive Noah's Ark theme, selected by staff as their favorite story from the curriculum. The splash pad blends essential and themed aquatic play elements to create a dynamic, multi-sensory environment that is both engaging and accessible. A custom Noah's Ark Aqua Slide stands as the splash pad's centerpiece, helping transform the space into an immersive aquatic storytelling experience inspired by the classic tale. The water slide is designed to resemble a vibrant ship sailing across the seas, with a lively collection of spritely zoo animals aboard. Children can spot spraying zebras, giraffes, lions, elephants, and tropical birds perched along the boat, each rendered with playful expressions and bold colors to spark imagination and wonder.

A collection of whimsical, animal-themed Aqua Spouts, including Harry Hippo, Gracie Gator, and Tommy Sea Turtle, provides soft spray effects with fun theming. The Dolphin Duo Aqua Sprayer gives the illusion of playful dolphins jumping through the water, further setting the scene. Two Little Sqwerts Spin N' Spray Fish positioned at opposite ends of the splash pad add an element of interactive aquatic play for smaller children. Paired with various ground sprays including the Water Weave, Splash-O-Lator, and Cloud 9, these aquatic play features offer a range of water effects, from gentle sprays to playful bursts, catering to children with varying sensory preferences and abilities.

The splash pad design is rooted in inclusivity, providing a fun water play area where children with disabilities can play alongside their peers. With no standing water and a variety of spray features at multiple heights and intensities, this splash pads design provides one of the most accessible forms of aquatic play. By incorporating sensory bays with soft sprays, low-profile sprayers, and interactive features like water slides and interactive sprayers, the Sarah A. Harmon Splash Pad ensures that every child can find joy in aquatic play.

GROUND SPRAYS

INTERACTIVE & INTERCHANGEABLE

SHAPING THE WAY WE PLAY WITH WATER

Ground Sprays, also known as flush mounts and deck sprays, are at the core of aquatic play. These features offer a wide variety of water effects typically seen in the fountain industry. Made from Stainless Steel and Brass, Flush Mount ground sprays are built to last. The top plates can be theme-painted to give your facilities a truly unique play experience.

Theme painting for a truly unique look

Water Odyssey can paint your ground sprays to match the rest of your theme to help your facilities stand apart from the rest.

Precision effects with long-lasting materials & finish

Precision-machined brass and stainless steel nozzles create quality effects, are easy to maintain, and last for years to come. Top plates are cast brass and available in a natural finish, or in Aqua Armor for a chlorine & UV resistant color finish.

Low flow features for water conservation

We understand that water conservation is a big deal. That's why we provide a wide variety of water conserving ground sprays, so you can make every drop count.

STIMULATE THE SENSES WITH A VARIETY WIDE OF SPRAY EFFECTS

Let Water Odyssey be a part of your design team help to you create a magical space full of wonder and excitement.

This custom nature-inspired tree structure is complete with a slide, dumping buckets, and water sprays.

Fort Worth Zoo

People flock to the zoo just to play in the water park. This Safari themed multi-level slide structure has slides at each level, animals that spray water, and a tidal tank that dumps a massive splash of water for a fun-filled aquatic play experience.

FEATURED PROJECT

TEXAS STATE AQUARIUM

The HEB Splash Park at the Texas State Aquarium in Corpus Christi, Texas, marks a significant expansion and refurbishment of the previous splash pad. Driven by the growing attendance rates at the aquarium and the desire to offer an enhanced, modern aquatic play experience, the new 15,000-square-foot splash park is three times the size of its predecessor. Designed with a captivating marine theme reflecting the Caribbean's wildlife, the interactive spray park caters to all age groups, making it an inclusive and delightful water play destination for families and visitors.

Inspired by the aquatic habitats of the Caribbean, the new splash park showcases a marine theme that reflects the aquarium's diverse wildlife. This immersive splash pad design transports visitors to the vibrant and mesmerizing world of the Caribbean seas, offering an educational and engaging experience for all.

The spray park thoughtfully caters to all age groups, ensuring that visitors of all ages and abilities can enjoy the water play. The splash park features a large, GFRC water play structure and waterslides tailored to mid-age children and teens, providing thrilling and exciting experiences. Additionally, a dedicated interactive water feature and ground spray area are designed to entertain younger children and toddlers, making the park a family-friendly destination for everyone.

This water play park incorporates marine-themed Water Odyssey Aquatic Play Products to elevate the water play experience. Custom-designed features such as the Tree Tidal Tank, Dolphin Sprayer, Brown Shark, Hammerhead Shark, Sea Turtle Sprayer, Sting Ray Sprayer, and Nurse Shark Aqua Slide, in addition to an array of ground sprays and the Mushroom Maze, create a thrilling and imaginative aquatic adventure for visitors.

WATER MANAGEMENT SYSTEMS

Typical Recirculation Scenario

Recirculation systems are ideal solutions when water restrictions are high. Much like a swimming pool, these systems allow water for the spray park to be re-treated to meet or exceed local health department requirements and be recirculated/reused, saving potentially millions of gallons of water annually.

HOW IT WORKS

Flow Diagram

Incremental numbers show direction of water flow.

RECIRCULATION SYSTEM COMPONENTS

Equipment Skid

Skid systems have been designed for projects which have an equipment room. These systems are designed to accommodate projects of all sizes. They include pumps, filters, valves, manifold, controller, motor starters, and ORP/pH chemical controller. Available in both Single Loop 100% Filtration and Double Loop Continual Filtration models. Skids are fully assembled and pre-tested at the factory prior to shipment and are U.L. Listed as an assembly.

Semi-Buried Equipment Vaults

Designed for projects which do not have an equipment room, self-contained systems include pumps, filters, valves, manifold, controller, motor starters, and ORP/pH chemical controller. Available in both 100% filtered and articulated models. Units are fully assembled and pre-tested at the factory prior to shipment and the internal control system is UL Listed.

Self-Contained Vaults

Direct burial vaults are perfect for small to medium projects. These systems pass all of the return water through the filters as opposed to articulated systems which have separate pumps for filtration and play component operation. All direct burial systems are pre-assembled and pre-tested at the factory prior to shipment. Internal control system is UL Listed.

Chemical Storage & Metering Systems

Chemical Systems are designed specifically for aquatic playground use. These are complete pre-plumbed and pre-wired liquid chemical storage and metering systems that are suitable for indoor or outdoor installation. These units may also be installed either above-grade or below depending on the needs of the project.

Reservoirs

Reservoirs are designed specifically for water features and spray parks. They are constructed of rustproof, long-lasting FRP (fiber reinforced plastic) with integral ribs for added strength. These units are manufactured with resin conforming to NSF 61 requirements for potable water tanks and to applicable requirements of Underwriters Laboratories 1316. Basic units include a fiberglass ladder, a mechanical fill valve and all connections required for the specific project design.

Drains

The Water Odyssey Plain Drain and Maintenance Minimizer are cost-effective and ease maintenance. They feature a formed polyethylene sump, a molded polyurethane strainer basket, and a heavy-duty, ADA compliant grate with two quarter turn captive lock screws for quick maintenance. The Maintenance Minimizer also features a rain diverter service & winterization connection and is rated fro 125 GPM, cycling 4 times the amount of water as a Plain Drain.

Rain Diverter System

For situations where heavy rain conditions are common, this "off-pad" solution is ideal for diverting stormwater from the pad during non-operating hours. Rain diverters return water from the recirculation system to the reservoir during operating hours.

NOTE: Equipment may vary from project to project based on the needs of the design.

Typical Flow-Through Scenario

Flow-through systems, also know as potable & single-pass systems, are a cost effective solution when water restrictions are lenient. These systems are common for smaller projects that use less than 100 gallons per minute. This also makes them ideal solutions when the goal is to repurpose the water for irrigation, reintroduction into the ground as percolation, and water retention ponds.

HOW IT WORKS

Manifold Enclosure Boxes

Manifold boxes are of all 1/8" Aluminum construction to NEMA 3R standards and feature overlapping doors with full height stainless steel hinges, 3-point latching 3/4" stainless steel handle with padlock hasp, and a #2 Corbin Russwin lock. These vandal resistant enclosures are ideal for housing Wall Mounted Manifolds and the DSC Controller above grade without the need for pump/controller rooms or buried vaults.

Wall Mounted Manifolds

Wall Manifolds are of all stainless steel construction and feature dual inlet connections with a removable plug, true union balancing valves, water hammer arrestor, hose bib, and pressure gauge. The solenoid valves are durable, easily maintained cast brass with a 24VAC UL recognized solenoid, and a DIN connector with a pre-wired 15 foot type SO cable. Use with DSC Controller.

Valve Boxes

Valve Boxes are of heavy-duty FRP construction with drafted sides for increased strength. FRP lids are strong, light weight, and do not create a heat hazard for small feet on hot days. All units have a wiring channel, a 2" conduit connection, and stainless steel tamper-resistant fasteners. Use with DSC Pedestal Mounted Controller.

In-Ground Manifolds

In-Ground Manifolds are of all stainless steel construction and feature true union balancing valves, water hammer arrestor, hose bib, and pressure gauge. The solenoid valves are durable, easily maintained cast brass with a 24VAC UL recognized solenoid, and a DIN connector with a pre-wired 15 foot type SO cable.

Drains

The Water Odyssey Plain Drain and Decorative Drains are cost-effective and ease maintenance. They feature a formed polyethylene sump, a molded polyurethane strainer basket, and a heavy-duty, ADA compliant grate with two quarter turn captive lock screws for quick maintenance. Drains with decorative designs are also available.

NOTE: Equipment may vary from project to project based on the needs of the design.

DSC Series

Dynamic Sequencing Controller

Designed specifically for Aquatic Playgrounds, the DSC is the only controller in the aquatic play industry that has wireless capabilities, and is available as an ETL (UL 1563) listed controller for swimming pool applications.

Features:

- 1. Accepts Wireless and Hard-wired signals.
- 2. UL 508A Listed Control Panel. *Available in ETL (UL 1563) for swimming pool applications.
- 3. Every project controller is supplied with a program for the specific project.
- 4. SD Card slot for Play Scenario backup.
- 5. Compact NEMA4X housing .
- 6. Easy to program or make operating hour changes in the field through the keypad interface. Upload play scenario directly to the Controller Module with an SD Card.
- 7. “Polarized connectors” – terminal blocks - make wiring easy and quick – specialized installation tools supplied.
- 8. Write original dynamic programs (not just select from pre-programmed packages).
- 9. Output displays – indicator lights show activated outputs
- 10. Control module may be used remotely, e.g., adjacent to play area while making program adjustments using CAT5 cross-over extension cable.

Features:

- Manages Hours of Park Operation
- Controls Play Scenario
- Manages Water Usage

* (ETL Listed for Swimming Pool application -1. UL Standard for Safety for Electric Spas, Equipment Assemblies, and Associated Equipment, UL 1563, Fifth Edition, Dated March 8, 2004, containing revisions through and including February 10, 2006. 2. Canadian National Standard for Spas, Hot Tubs, and Associated Equipment, CAN/CSA C22.2 No. 218.1-M89, First Edition, including April 2006 updates.)

Pedestal Mounted DSC

Designed for outdoor use, this corrosion-resistant assembly features a heavy-duty FRP base with a NEMA-4X stainless steel, lockable enclosure. An ideal solution when a secure panel mounting area is not available. For use with valve boxes and in-ground manifolds.

Single Timer Controller

An economic solution for aquatic play

The Single Timer Controller is ideal for small spray parks & unsupervised facilities. Easy to operate, this ETL/UL listed controller is 7 day/ 24 hour programmable with fine-tuning adjustment of 1 second up to 24 hours. This unit is designed to control multiple water features with a wired activator and a brass solenoid valve to supply water up to 100 gallons per minute for the specified time duration. The Single Timer Controller is perfect for when you need a simple, low cost, low maintenance solution for aquatic play! Contact your local Water Odyssey representative for more information.

TYPICAL ACTIVATION

Water Odyssey innovation has developed wireless activation to reduce maintenance and installation costs while providing greater flexibility in design. Water Odyssey activators are FCC registered and labeled. (Also available in hard wired versions.)

Touch & Go

The Touch & Go activation bollard is durable, reliable, low voltage and available in all standard colors. Available in wireless and wired versions.

Launch Pad

The low profile of the Launch Pad makes it unique in the industry. It is durable, reliable, low voltage, and may be deck or wall mounted. Available in wireless and wired versions.

FINISH & COLORS GUIDE

AQUA ARMOR

AQUA ARMOR

- Toughest Coating in the Industry
- Bright Long-lasting Color
- Outstanding Chemical Resistance
- Outstanding Scratch and Abrasion Resistance

Water Odyssey’s Aqua Armor is the best and most durable coating system available in the industry today. It is applied in a five-step carefully controlled process that ensures a durable, fade-resistant finish that is far superior to polyester powder coat systems. Unlike powder coating, Aqua Armor is field repairable to factory standards.

STANDARD COLORS

LUSTERCOAT

LusterCoat is a Metallic finish incorporating Aqua Armor. Now you can have the metallic look a metal surface without the high maintenance of constant cleaning.

Notes for Selecting Paint Colors:

- Theme painting is not available with metallic colors.
- Smooth finish requests will be subject to an upcharge.
- Non-standard, custom color, and custom paint scheme requests will be subject to an upcharge.
- If a color is non-standard or customer specified, it must be submitted to and approved by the factory.

Disclaimer:

Colors, though mixed in a controlled environment, are subject to variation in tone and hue. Many variables, such as comparisons on digital devices, aging color books and samples, UV exposure, light source, surface type, and finish affect the matching of colors to PANTONE, RAL, and paint manufacturers color books and paint samples. These variables will affect color interpretations.

FINISH & COLORS GUIDE

COLORCAST

COLORCAST

ColorCast Polymer Accents and Panels are offered in a variety of colors. Lighter colors allow more light to pass through while darker colors offer bold statements and contrast. Color combinations create color mixing and cast colorful shadows on the ground. Some spray features create an educational experience in color theory when accents overlap.

THEMING

CAPTURE THEIR IMAGINATIONS

CREATIVE THEMES

Limited only by the imagination, Water Odyssey theming keeps youthful hearts entertained by providing the creativity your aquatic playground needs. Our Water Odyssey design team offers new and exciting play features in a variety of themes from ocean life to forest creatures. We can also create custom designs based on your ideas and requests.

Whether a standard product or custom creation, Water Odyssey is able to develop “the look” for your specific project needs.

Theme Painting

Water Odyssey offers theme painting like no other. Here is an example of a Flush Mount ground spray feature that has been theme painted with a crab.

Custom Painting

Water Odyssey offers custom theme painting like the Tidal Barrel sponsored by Dr. Pepper® shown above. Custom theme painting includes logos, icons, mascots, and paint matching for color systems such as Pantone and RAL.

Theme Carving

Products with carved additions, like the Parrot on the Tidal Bucket shown above, are a great way to create a unique play experience.

Dr. Pepper is a registered trademark owned by Dr Pepper/Seven Up, Inc.

Dedicated to helping you every step of the way

Our passion at Fountain People is to tell stories with water, light, sound, and motion. We are committed to bringing your creative vision to life. That is why we are driven to provide the highest quality water feature and aquatic play equipment to the industry. We support our clients through excellence, integrity, teamwork, innovation, and fun. We value the trust you place in us; therefore, we vow to stand by you from concept to completion and beyond.

DESIGN SUPPORT

Water Odyssey's design staff & network of representatives are available and prepared to assist you with the complimentary design support that you need to achieve a successful aquatic playground installation. From the selection and specification of equipment, to hydraulic design, Water Odyssey designers always consider play experience, safety, equipment placement, color themes, and budget when designing your aquatic playground.
